76 Main St Keystone

(L-R) flea tapeworm egg, roundworm egg both found under a microscope during routine exams

## March 2024 Newsletter Your Other Family Doctor

Meet Ollie, a 7 year old Harrier. Ollie’s owner adopted him knowing that he was heartworm positive and would need to undergo life-saving treatments. Ollie was showing signs of respiratory issues including a cough. He was started on some oral medications and began a series of injections in the lumbar muscle around his spine to kill the heartworms. Ollie’s owner keeps him on a monthly heartworm prevention to maintain his heartworm-free status.

(Pictured: Ollie Exploring)

Did you know that your pets can share intestinal parasites with you and your family? We commonly a fecal test at your pet’s annual wellness visit, but we can check them any time! Bring along a fresh sample in a Ziploc or container you don’t want back, and we can have results within a couple of days. This testing is recommended annually, and most parasites are easily treatable.

**Stop into our clinics to see real life specimens in jars that came from patients!**

## Heartworm Deal Days
