Can you guess which staff answered with which breed?

- Cavalier King Charlies
- Doberman
- An Adult German Shepherd
- Golden Retriever
- A Pregnant Dalmatian
- Labrador Retriever
- Pregnant Basset Hound
- A HOT DOG!!
- Something Small
- Corgi
- Something Insured

Pet of the Month Spotlight

Morty is a 3 year old dog that came to the clinic for excessive vomiting, not eating, and acting lethargic. After performing bloodwork and radiographs at our clinic he was suspected of having a foreign body that was stuck and couldn't come out on its own. He was started on IV fluids and moved into surgery where a corn cob was removed from his small intestine. Despite extensive trauma to his GI tract, Morty went on to make a full recovery with medication, time, and some TLC from his family!

Calving Season

Calving season is quickly approaching. Here are some essentials to consider in order to help your calving season go as smoothly as possible:

1. Scour vaccine for your cows
2. Colostrum
3. A clean, dry area to put a newborn
4. Snacks and patience!

Pictured above are x-rays of various foreign bodies that we've removed from some of our patients during surgery.

Can you guess what any of them are?

February is Pet Dental Month

Can you name the species of animals these teeth came from?
